

AmeriHealth NJ Pediatric Dental

Small Group Market

- AmeriHealth will be automatically enrolling all members in pediatric dental upon renewal.
- This product is standalone and can be removed at the group level only, not on an individual basis.
- This product does offer an adult benefit and is not limited to only dependents under age 19.
- In order to remove the pediatric dental, members must show AmeriHealth proof that other compliant dental coverage is in place.

Individual Market

- Just like the group product, AmeriHealth's pediatric dental can only be removed if you have other ACA compliant dental coverage in place.
- AmeriHealth will ask for proof of other dental coverage. They will accept an ID card, bill, benefit booklet, or contract book. They may change this to request only the detailed information, but this is the current requirement.
- All members including adults receive a dental benefit and are charged premium. Adults have access to preventive care only.
